LEARNING • TEACHING • RESEARCHING THE DIFFERENCE

Introduction

**Framework for course development:
Constructive Alignment**

**Course: GIS 1, a 2nd year course in a 4
year BSc Geomatics degree**

 UNIVERSITY OF CAPE TOWN
LEARNING • TEACHING • RESEARCHING THE DIFFERENCE

What is Constructive Alignment?

Framework for

“deriving curriculum objectives in terms of performances that represent a suitably high cognitive level, in deciding teaching/learning activities judged to elicit those performances, and to assess and summatively report student performance” (Biggs, 1996)

Guides the total learning experience

Theoretical Framework

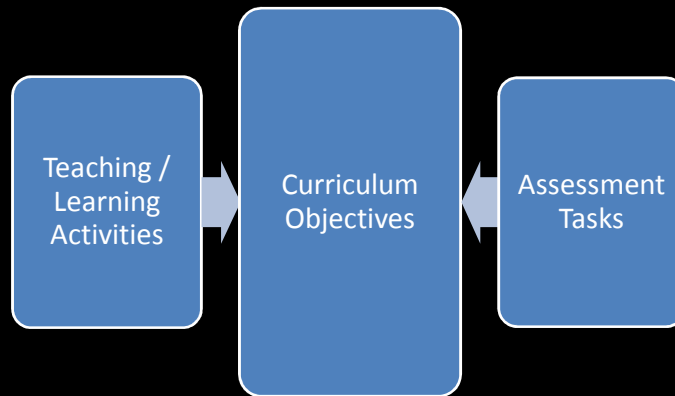

Constructivism

“learning is an active process of constructing rather than acquiring knowledge”;

“instruction is a process of supporting that construction rather than communicating knowledge” (Duffy & Cunningham, 1996)

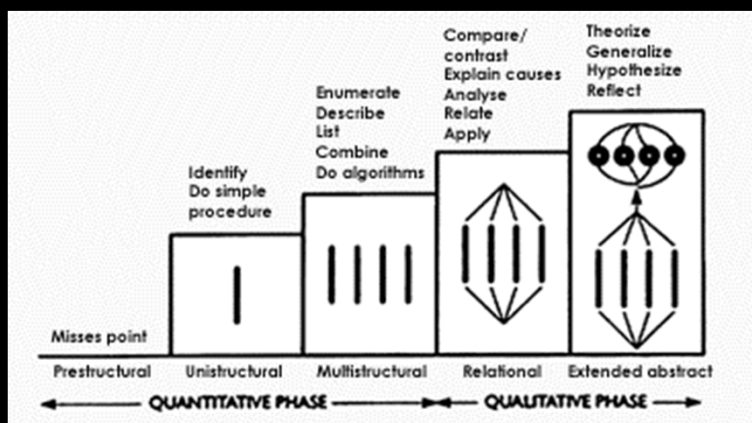

Student-centred learning to aid deep learning

Constructive Alignment

The “GIS Moment”

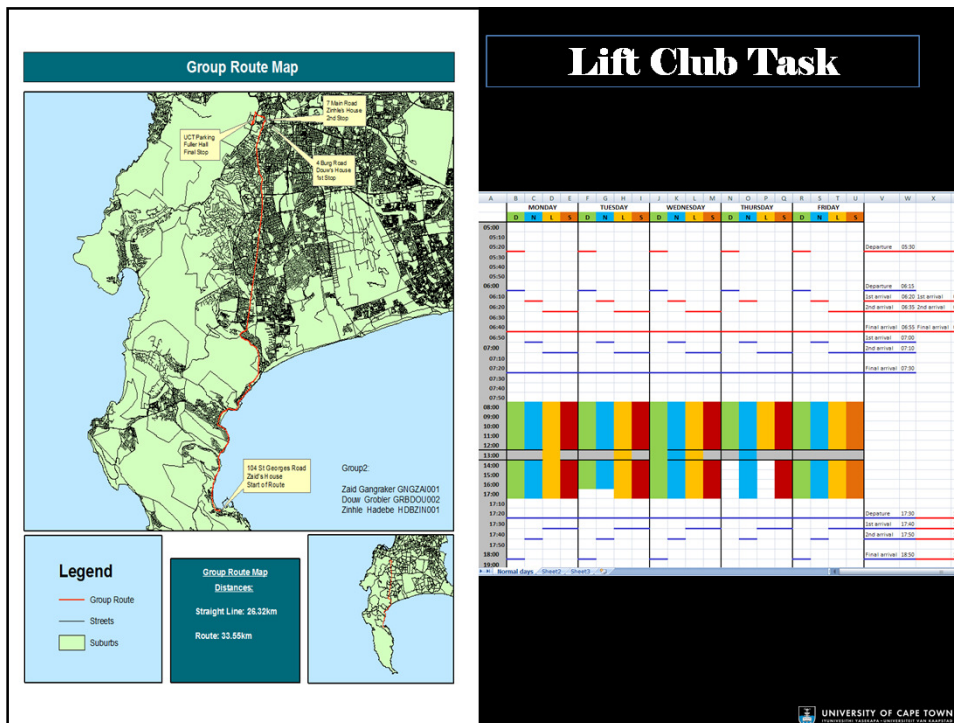

Groupwork

Map Projection

Lift Club Task

Evaluation

After constructive alignment, improvements in:

- **Practicals / tutorial assignments;**
- **Group work**
- **Lectures**

UNIVERSITY OF CAPE TOWN
ADVANCEMENT THROUGH LEARNING

Evaluation

Before Constructive Alignment:

“There is a lot of theory to learn which is actually not needed”

After Constructive Alignment:

“The discussions that we had in class was good, how to solve real problems using GIS was great”

“It was good when you showed us, when you physically did something on the GIS, so we can see how it’s applied”

Conclusion

- **Useful tool that provides guiding principles to develop students’ experience**
- **Constructive alignment difficult or impossible to achieve – important to be a reflective practitioner**
- **Students must engage in activities that achieve learning outcomes**

Thank You
