

FIG Working Week 2013
Abuja, Nigeria, 6-10 May 2013
Invitation for exhibitors and sponsors

Dear Friends and Colleagues,

It is our privilege and honour to invite you to the FIG Working Week 2013 in Abuja, Nigeria to be held from 6th to 10th May 2013.

The Working Week will offer a full technical programme with trade exhibition and technical and social tours. The overall theme of the Working Week is “**Environment for Sustainability**”. Each day of the technical programme will be dedicated to one sub theme that addresses one aspect of the main theme. The main theme recognizes the current challenges, landscape and horizons facing the Profession as it seeks to enhance its relevance and role within our interconnected and dynamic physical, social and economic environment. The theme is selected so that it also implements the theme of the current FIG term of office: “**Engaging the Challenge: Enhancing the Relevance**”.

The Working Week will bring surveyors and land professionals from all over the world together to meet while specific focus will be given to Africa. The conference is organised jointly by FIG and the Nigerian Institution of Surveyors, NIS, one of the three FIG member associations in Nigeria. The international partners of the Working Week include UNECA, UNHABITAT-GLTN and FAO. The local partners include the other two Nigerian member associations of FIG namely NIQS and NIESV as well as SURCON and OSGOF. The organisers are expecting up to 3,000 participants to Abuja in May from more than 70 countries.

The sub-themes cover professional standards and ethics; education and training; management of spatial information; hydrography, global positioning and surveying techniques, engineering surveys, cadastre and land managements, spatial planning and development; real estate management and evaluation; and construction economics and project management thus covering all ten FIG commissions. The technical programme will include a broad professional and scientific programme with 7 slots each offering from 6 up to 10 parallel sessions and workshops. With flash presentations the programme offers more than 300 presentations in a three-day technical programme.

The international trade exhibition will take place in conjunction with the Working Week, on 7-9 May 2013. Sponsors and exhibitors representing relevant professional businesses and organisations, as well as those from industries and businesses that are peripheral and/or complementing the professional fields are invited to participate and display their products and services. The exhibition will be located at International Conference Centre and in the Nikon Luxury Hotel. The technical programme of the Working Week is expected to be spread between both these venues. Coffee breaks and lunches are expected to be served within the exhibition area.

Enclosed please find the various Sponsoring Packages and Exhibition Options, as well as the Floor Plan and Overview of the exhibition space. The floor plan includes about 64 booths and the expected exhibitors include international and national companies and agencies operating in surveying, GIS, engineering, construction, telecommunications, insurance and new technologies.
