Nominees statement	
Why I want to be Vice President	<p>Over 100,000 surveyors are registered with CNGeGL in Italy. They carry out their profession in all areas covered by the FIG Commissions.</p> <p>At least 30% of members (30,000-35,000) work to update the land registry, which, in Italy is entirely delegated to professionals in technical areas, of which surveyors make up the largest component.</p> <p>That is why it is very important that Italian Surveyors have a significant presence in FIG.</p> <p>Through the Vice Presidency, I would support the important role that surveyors play in society and the profession's invaluable technical role in proper land management.</p> <p>In fact, I am convinced that society needs the work of the surveyor to improve our understanding of the territory and to be able to manage and administrate it, in accordance with and according to the needs of those who live in it.</p> <p>The work of the FIG Commissions should lead to an improvement in the knowledge of surveyors around the world, a balanced relationship between academia, the role of public institutions and the role of the private professional world, where every member can and must make his knowledge and know-how available to society.</p> <p>In addition, I intend to work to encourage and stimulate</p>

	<p>young people to pursue the occupation of surveyor, to exercise it at every level. That is why it is essential to introduce new initiatives and new opportunities for future generations.</p> <p>To do this it is important that we design, propose and carry out the necessary reforms of the rules for, and the activities, work and training of surveyors reforms that will allow us to perpetuate this profession all over the world.</p> <p>The organization of the International Topography Course offered by CNGeGL, and of which I am a promoter, is one of the practical steps that can be taken to identify new strategies and new opportunities for developing the role of the surveyor both at present and in the future.</p>
What I can offer to FIG in support of its aims and objectives	<p>I can offer my personal enthusiasm and passion, along with the support of all Italians Surveyors, in carrying out initiatives that spread the prerogatives for professional service quality of surveyors in all areas of expertise, especially those who are self-employed.</p> <p>I can also offer my thorough understanding of all land registry matters in order to contribute to the growth and development of real estate advertising, the recognition of real property rights and the formation of an inventory, multi-disciplinary land registry system that is of high quality and useful for all of society.</p>
My key skills	<p>Working for a future by providing concrete support for initiatives that:</p> <ol style="list-style-type: none">1) stimulate the opportunities for and the expectations of young surveyors throughout the world;2) foster the development of research and experimentation in order to define innovative land management models and geodetic information;3) promote cooperation between experts throughout the world in order to contribute to:<ul style="list-style-type: none">• achieving cooperation and dialogue between peoples;• defending rights;• supporting human rights
Any other general comments	<p>Great results can be achieved by the work of all the FIG Commissions, refining and improving the relationship between the academic members and the professional ones, so as to get the best synergies in describing the results achievable by all the FIG commissions</p>
