

Authors Index – S

[Deformation Measurements of Landslides in Swabian Alb -
Research Projekt InterRisk-](#)

W. Schauerte, R. Bell, T. Glade, H. Kuhlmann

[Terrestrial laser scanning for area based deformation
analysis of towers and water dams](#)

D. Schneider

[Comparison of correction models for distance dependent
systematic effects in GPS monitoring networks with large
height differences](#)

S. Schön

[Modelling physical correlation of GPS phase observations:
First results](#)

S. Schön, F.K. Brunner

[GPS Monitoring Networks: Interval-based description of
measurement uncertainties due to remaining systematics](#)

S. Schön, H. Kutterer

[Sensitivity Analysis as a General Tool for Model
Optimisation – Examples for Trajectory Estimation](#)

V. Schwieger

[Folding of Moho and GPS survey in Tibet](#)

Y.H. Shin, H. Xu, P.H. Park, J.U. Park

[Subsidence prediction caused by the oil and gas
development](#)

A. Sroka, R. Hejmanowski

[1D and 3D Systems in Machine Automation](#)

W. Stempfhuber

Deformation measurements at historical buildings with the help of three-dimensional recording methods and two-dimensional surface evaluations

H. Sternberg

Relation between Monitoring and Design Aspects of Large Earth Dams

A. Szostak-Chrzanowski, M. Massiera

Continuum Mechanics as a Support for Deformation Monitoring, Analysis and Interpretation

A. Szostak-Chrzanowski, W. Prószyński, W. Gambin
