

Importance of Survey Marker Standard for ISO or FIG as Defacto Standard

Kengo Okada (Japan)

Key words: Cadastre; Deformation measurement; Engineering survey; Low cost technology; Positioning; Professional practice; Standards; survey markers; survey monuments

SUMMARY

Worldwide there are many types of survey markers used. In quantity, survey markers are the most used piece of equipment.

Currently there is no world standard for survey markers. It is time to consider creating a world standard for survey markers.
